

REQUEST FOR FURTHER INFORMATION (RFI) – STOCKPILING

(To be lodged with the Application to carry out works in a road reserve for requests to stockpile)

Name of Applicant:.....

Date: ____/____/20____

Type of material:
(e.g. dirt, gravel, clean fill, waste, ballast, culverts, machinery)

The applicant must submit with this RFI a site plan including:

- stockpile site entry and exit points;
- turn around areas;
- site access tracks;
- appropriate signage for routing vehicles;
- type, volumes and height of materials to be stored on the stockpile site;
- location of where any machinery, vehicles or materials will be stored;
- location of any para webbing fences, sediment fences or any other barricading fences;
- location of uhf channel sign (if required);
- slope of the site (direction of flow); and
- any open drains adjacent to the site.

| CHARACTERISTIC | NO | YES |
|---|----|-----|
| 1. Will there be more than 2,500 tonnes of inert waste (i.e. spoil or concrete that is not to be re-used) to be stockpiled at the site at any one time? | | |
| 2. Is the site undisturbed (i.e. is it in its natural state)? | | |
| 3. Is there native vegetation within 10 metres from the stockpile site boundary? | | |
| 4. Is there native vegetation such as shrubs and trees on the proposed site? | | |
| 5. Are there any tree hollows within the stockpile site area that could be fauna habitat? | | |
| 6. Is the site within 40m of a watercourse? | | |
| 7. Is the slope of the site more than H:V 10:1? | | |
| 8. Are there any sensitive receivers (<i>residence, schools, places of worship, hospitals</i>) within 250m of the site? | | |

Risk

The site is of **Low Risk** if the answers to:

- questions 1 and 3-8 were “No”; and
- question 2 was “Yes”.

The site is of **Medium Risk** or **High Risk** If the answers to:

- questions 1 and 3-8 were “Yes”; and
- question 2 was “No”.

Stockpile Environmental Management Plan

For Medium Risk or High Risk sites, a site-specific Stockpile Environmental Management Plan (SEMP) drafted by a suitably qualified person(s) may be required to be submitted to council as part of its decision making process.

The SEMP must detail the environmental controls, maintenance and inspection schedule required to ensure impacts on the environment are being minimised and that the stockpile site is being maintained.

De-commissioning of stockpile sites after use will be conducted to reinstate the stockpile site to near natural conditions. De-commissioning will involve the following activities:

- clearing all stockpile material from the site and recycling or disposing of it at a licensed facility;
- stabilising the site by planting and/or landscaping the site; and
- removing control measures such as erosion and sedimentation devices once the stabilisation has occurred.

The applicant must contact council within ten (10) business days of de-commissioning.
